

# Problem conscious student

You live with four roommates in one room, accommodate only three? You have a year sleeping on a broken bed without a leg just because it's the only thing left free? You eat standing up, because just in the room no place to sit? Your things stored under the bed in the bags, because not enough shelves in the closet?

Such questions can be set indefinitely, and is only a small part of the problems that exist in modern dormitories. But the problem is not only in appalling conditions, but in the apathy of students who reside in them. They just don't want to defend their rights. Perhaps it is due to ignorance that conditions should be much better, perhaps afraid of the administration of the hostel and the campus, afraid of being expelled, will leave no place of residence. But such problems exist, and they definitely need to be addressed. Because they can cause not only a question of liveability, but also the health of the student.

But, unfortunately, such problems are very rarely raised in our country, and even when raised, to move forward is almost impossible. For example, in April 2011; June studied almost all dorms at Russian universities. The results of the surveys and questionnaires were even worse than expected. Accommodation in some hostels were simply impossible. Detected abnormal condition of the buildings is unnatural to use the plumbing and unacceptable violations of sanitary norms. So at the end of the monitoring campaign and all the results of the study were submitted to the Prosecutor together with the treatment to improve the condition of the campuses. It was a full year and the results of last year's campaign to date can be called 2013; nothing! Well, well, almost nothing has been done to improve living conditions. And students both lived in silence, and live. And this applies not only to the far region, but throughout Russia.

In my opinion, is to slightly shift the question of hostels with locations, you must first, to interest themselves "suffering" in its decision. After all, if it is a problem only some people, nobody wants to solve it. But if it becomes a problem for society, the public authorities simply have no choice.

And if you look from the other side: why should anyone solve the problems of students? If they are silent, they certainly and so life is good. But we again and again come to the same answers 2011; simple fear. Is it fair when students from different universities to pay for accommodation about the same, but some live in normal conditions, while others are impatiently waiting for the end of the school year to keep from leaving the hostel? It is normal when people spend their health several times more than I paid for the Dorm. A reason for this may be violated health standards. So maybe then is better not to use the housing provided by the University, and to rent an apartment? Maybe it will be cheaper and better for health?

It is better to live is like? So just ask our European colleagues. They have such problems for some reason, almost never occurs. And even if occurs, the CONSCIOUSNESS of the people their wins. Therefore, they live much better: rooms for 2-3 persons, with one allocated enough space to live normally and to learn. Shower and toilet is at least one on the floor and in every room [do my excel homework](#) There are always normally-lit reading rooms with computers connected to the Internet. And they is never a question of cockroaches, mice and rats. And in our country for some reason, such conditions can only be found in some private universities. Why one man-the owner of this University can maintain the normal condition of the dormitories, the state to do this for the state Universities can't? The answer is simple 2011; students do not turn and do not ask that something has changed.

So I appeal to You, dear students, do not be indifferent! Live for yourself, to seek justice for themselves, demand a normal attitude. Your life is in the first place 2011; in Your hands. And except You, nobody can change!
